

## 2nd biggest lotto jackpot drawn tonight

By John M. Llaneta

THE 10TH DRAWING OF THE 6/49 LOTTO JACKPOT was held last night, with the winning numbers being 1, 10, 19, 24, 34, 44, and 49.

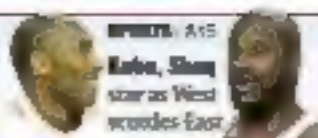

But despite the fact that the jackpot is the 2nd biggest in the history of the game, the winning numbers were not the same as the previous drawing.

"I don't know if I could see the winning numbers, but I could see the winning numbers," said a man who was at the drawing.

THE JACKPOT IS \$1.5 MILLION.

**COPW URGES DOE SECRETARY ANGELO REYES  
AND DOJ SECRETARY RAUL GONZALES TO PERFORM  
THEIR REGULATORY FUNCTIONS AS TASKED BY  
THE OIL DEREGULATION LAW TO PROTECT  
THE CONSUMERS AND ENSURE TRANSPARENCY.**

Over the past 71 years the DOE and the DOJ have been passive in implementing the safeguard provisions of the Law. With the increasing volatility of oil prices, it has become more urgent for these regulatory agencies to exercise their functions and prevent to ensure fairness and transparency in oil pricing.

To ensure that the pump prices of diesel and gasoline are fair and reasonable the DOE and the DOJ MUST require the Oil Companies to submit the sales and volume of their existing inventories which should include ocean freight, insurance, inland shipping, cost to deliver from dock to depot and to the gas stations and THE DETAILS OF THEIR FORWARD CONTRACTS.

**STABLE PRICES FOR APRIL, SUPPORT OILS CALLER TO A RECORD LOW OF \$27.94 PER BARREL ON FEB.13**

COPW urges the DOE and DOJ to ask Oil Refiners Shell and Petrobr and the international refiners Chevron and Total who control 90% of the markets explain if they bought forward for March delivery at \$33.99 NYMEX on Feb. 13 and \$27.94 on April delivery.

They requested will ensure that the Transport Sector, Truck Sectors, Private Nationals and the Government Public will benefit from lower prices in March and April.

More importantly, they will ensure transparency and accountability and that prices of crude oil and finished products are in ACCORDANCE WITH GLOBAL PRICES.

COPW are aware that pump prices went up because the Oil Refiners used NOPS, so they had to export finished products – diesel, gasoline and auto-gas – when they shut down their refineries for maintenance in December and January.

When the Oil Refiners resume refining in March, the Government will be subject to US NYMEX Crude. COPW suggests the Oil Refiners to effect automatic reduction if they do not, they will have to explain to the DOE and the public why not.

OPREC has announced that they will seek to increase oil production and increase prices.

On the other hand, the US Congress has approved the \$70 billion Economic Stimulus Package while US banks led by JP Morgan Chase, Citigroup, Freddie Mac and Fannie Mae have extended a commitment on Foreclosure until March 13.

# Random drug tests net 3 high school students so far

By Don E. Padilla

Two more Grade 12 students were randomly drug-tested and found to be positive for drugs, including marijuana, last week, according to a report from the Department of Education (DepEd).

DepEd officials said that the two students were from different schools in the region.

The random drug testing program is part of the DepEd's effort to reduce drug use in schools.

The program is part of the DepEd's Comprehensive School Safety and Security Program (CSSSP).

DepEd officials said that the program is part of the DepEd's effort to create a safe and secure learning environment for students.

# World Bank blinks, agrees to brief Senate

**MANILA**—The World Bank has agreed to brief the Senate on its proposed \$1-billion loan to the Philippines, a move seen as a significant step towards transparency in the country's borrowing process.

The bank's agreement to brief the Senate comes after a long period of speculation and controversy surrounding the loan. The bank had initially refused to provide details about the loan, citing confidentiality concerns.

However, following pressure from the Senate and the public, the bank has decided to brief the Senate on the loan's terms and conditions. The briefing is expected to take place in the coming weeks.

The Senate has expressed its interest in the loan, particularly in understanding the bank's assessment of the Philippines' economic situation and the specific terms of the loan.

The \$1-billion loan is intended to support the Philippines' economic growth and development. It will be used for various purposes, including infrastructure development, social services, and environmental protection.

The bank's agreement to brief the Senate is seen as a positive development, as it allows the Senate to exercise its oversight function and ensure that the loan is used for its intended purposes.

**Senate agrees to brief**

The Senate has agreed to brief the World Bank on the proposed \$1-billion loan. The briefing will provide the Senate with an opportunity to ask questions and seek clarification on the loan's details.

The bank's representative will be present during the briefing to answer the Senate's questions. The briefing is expected to be a formal session, with the Senate members and the bank's representative seated at a long table.

The Senate's decision to brief the bank is a significant step towards transparency in the country's borrowing process. It allows the Senate to exercise its oversight function and ensure that the loan is used for its intended purposes.

The bank's agreement to brief the Senate is also seen as a positive development, as it shows the bank's willingness to engage with the Philippine government and the Senate.

**Senate agrees to brief**

The Senate has agreed to brief the World Bank on the proposed \$1-billion loan. The briefing will provide the Senate with an opportunity to ask questions and seek clarification on the loan's details.

The bank's representative will be present during the briefing to answer the Senate's questions. The briefing is expected to be a formal session, with the Senate members and the bank's representative seated at a long table.

The Senate's decision to brief the bank is a significant step towards transparency in the country's borrowing process. It allows the Senate to exercise its oversight function and ensure that the loan is used for its intended purposes.

# Japan economy sinks deeper in worst crisis

**TOKYO**—Japan's economy is sinking deeper into a crisis, with the government's latest economic report showing a sharp decline in growth and a rise in unemployment.

The report, released by the Cabinet Office, shows that Japan's economy contracted by 0.1 percent in the third quarter of 2009. This is the first time since the second quarter of 2008 that the economy has contracted.

The report also shows that unemployment has risen to 5.3 percent, the highest level in over a decade. This is a significant increase from the 4.5 percent rate recorded in the third quarter of 2008.

The government has expressed its concern about the economy's performance and has announced a series of measures to stimulate growth. These measures include increasing government spending, cutting taxes, and providing financial support to businesses.

However, the report suggests that these measures may not be enough to reverse the economic decline. The government is expected to continue to monitor the economy closely and take further action if necessary.

# Boy dad raises 'broken Britain' fears

**LONDON**—A young father's struggles to raise his child alone have sparked fears of a 'broken Britain' where single parents are struggling to make ends meet.

The story of a young father, who has been struggling to raise his child alone, has been widely reported in the media. The father, who is in his late 20s, has been struggling to find a job and to pay for his child's education and living expenses.

The father's struggles have led to him being labeled as a 'broken Britain' father, a term used to describe single parents who are struggling to make ends meet. This has sparked fears that the situation is widespread and that the British social system is failing.

The government has expressed its concern about the situation and has announced a series of measures to support single parents. These measures include increasing financial support, providing job training, and offering counseling services.

## Summary

the 1990s, the number of people in the United States who are obese has increased by 50 percent, and the number of people who are overweight has increased by 100 percent. The increase in obesity is particularly alarming because it is associated with a number of health problems, including heart disease, diabetes, and certain types of cancer. The increase in obesity is also a major public health problem because it is a leading cause of death and disability in the United States.

There are many reasons why the number of people who are obese has increased so much in the United States. One of the main reasons is that people are eating more calories than they are burning. This is due to a number of factors, including the fact that people are eating more food, especially fast food, and that they are not exercising as much as they used to. Another reason is that people are living longer, which means that they have more time to gain weight. Finally, there is a genetic component to obesity, which means that some people are more likely to be obese than others.

There are many things that people can do to prevent or reduce their weight. One of the most important things is to eat a healthy diet. This means eating a variety of fruits, vegetables, and whole grains, and avoiding sugary drinks and fast food. Another important thing is to exercise regularly. This can be done in many ways, including walking, jogging, swimming, and dancing. Finally, people should get enough sleep, as lack of sleep can lead to weight gain.

Obesity is a serious public health problem, but it is one that can be prevented or reduced. By eating a healthy diet, exercising regularly, and getting enough sleep, people can keep their weight under control and live longer, healthier lives.

Further, evidence suggests that the more a person's social network is composed of people who are themselves socially isolated, the more likely the person is to experience social isolation.

**Insurance**  
 Another fact that was not widely known is that, in 1995, the average rate for life insurance was \$1.50 per \$100,000 of coverage. This rate was expected to rise to \$1.75 per \$100,000 of coverage by 2000. This rate was expected to rise to \$2.00 per \$100,000 of coverage by 2005. This rate was expected to rise to \$2.25 per \$100,000 of coverage by 2010. This rate was expected to rise to \$2.50 per \$100,000 of coverage by 2015. This rate was expected to rise to \$2.75 per \$100,000 of coverage by 2020. This rate was expected to rise to \$3.00 per \$100,000 of coverage by 2025. This rate was expected to rise to \$3.25 per \$100,000 of coverage by 2030. This rate was expected to rise to \$3.50 per \$100,000 of coverage by 2035. ## Injustice comes to Filipino vets—rescue

FEARTECA  
TAMARA

As a Filipino veteran, I have experienced the same injustice that has befallen many of my fellow veterans. We have been denied the benefits and recognition that we deserve for our service to the country. It is time for the government to take action and provide us with the support and resources that we need to live our lives in dignity.

The government has a responsibility to care for its veterans, and it is a disgrace that we have been treated so poorly. We have sacrificed our lives for the country, and we deserve the same respect and support that our fellow citizens receive. It is time for the government to stand up for its veterans and provide them with the care and support that they need.

Figure 1 is a line graph showing the dependence of the rate of polymerization ( $R_p$ ) on the concentration of the initiator ( $I_0$ ) for the polymerization of styrene in benzene at 60°C. The y-axis is labeled  $R_p$  and ranges from 0 to 0.001. The x-axis is labeled  $I_0$  and ranges from 0 to 0.001. Four curves are shown, labeled 1, 2, 3, and 4. Curve 1 is the highest, followed by 2, 3, and 4. All curves show a linear increase in  $R_p$  with  $I_0$ , with the slope increasing from curve 4 to curve 1.
